

Excellence in Medical Software and Services.

Unlock your potential and get into **Direct CONTROL** of your business and clinical needs.

Enhance your Hospital with Direct CONTROL Medical (DCM)

Our hybrid solution streamlines workflows, improves patient management, and boosts productivity. Experience seamless integration and real-time data access.

Developed in Australia in collaboration with medical providers and their staff, we are proud to deliver an Australian product with a 20-year track record and a modern foundation built for today and the future.

The clinical and billing management system assisting Day Surgeries, Hospitals, and Consultants nationwide.

Streamline the administrative and clinical processes and achieve a standard of excellence. On entering patient details once only, the Online Eligibility Check (OEC/ECF/ECO) is completed and the Informed Financial Consent (IFC) and Pre-Admission Questionnaire (PAQ) are generated for patient review. The IFC can convert to invoice and direct bill Medicare and Health Funds in a simplified and systemised manner.

Consistently making medical billing easy and quick with automatically updated fees, built-in rules, and real time eligibility checking, as well as integrations directly to your Accounting Application.

Adhering to all variations of workflow within a modern practice, support and backup on DCM is an integral feature to the success of its overall operation. Restructuring your workflow with DCM will guarantee to provide remarkable results, enabling you to grow your business efficiently and without the need for extra staff.

Get in touch today and take **CONTROL** of your business.

We have no idea how we ever coped over the years, before implementing Direct CONTROL.
Day Hospital, QLD

Keep your finger on the pulse of your business

DCM is suitable for all medical disciplines to include Day Surgeries and Hospitals applying necessary billing rules.

- Built in workflows to submit Statutory Reporting HCP (for all states) and PHDB
- Ability to set up Health Fund contracts with ease
- Customisable dashboards per user
- Built in Telehealth workflows
- Built in integration to Microsoft 365
- Direct integrations and exports to accounting platforms
- Includes an EMR, or option for integration to upstream or downstream EMR applications
- Maintain live connectivity with My Health Record (MHR) with auto uploading of files to include Discharge Summaries
- Electronic Prescriptions
- Access to provider, patient, and hospital online portals
- Access to Informed Financial Consent (IFC) workflows
- Delivery of Pre-Admission Questionnaire (PAQ) with results populating directly in DCM
- Easy communications with patients through SMS, email, and access to patient portals for patient detail confirmation, IFC workflows, and PAQs.
- Options for automated SMS communications with patients as well as ability to set up customised SMS templates
- Option for online bookings built into your website

- Hybrid approach with option for locally or cloud hosted platform delivery with full data migration and data cleansing included as part of our onboarding process
- Demonstrations, access to trial environments, and training during the sales and onboarding process to explore workflows, features, and configurations that fit your Hospital or Practice.
- Licencing and annual support costs based on the number of Theatres or Beds/Chairs instead of DCM users
- Option for mixed licencing to use DCM for the specialist and the hospital on one application

DCM allows you to focus on what you do best - patient care. Get in touch today to arrange a free product demonstration.
